Comments Summary

Task	Project	Summary
Client 50	FP - Advice (Implementation)	The client's superannuation rollover to Praemium was completed in early February, with the account set up, invested, and pension payments adjusted. Recent follow-ups focused on signing the ongoing fee form, managing incoming AMP contributions, and confirming fee payments—though the fee form remains unsigned and AMP access is still pending. The current status is that the rollover is finalised, but some administrative tasks, like fee authorisation and AMP account monitoring, are unresolved.
Client 52	FP - Advice (Implementation)	The task involved transitioning a client's superannuation from an accumulation account to a pension account, including processing a \$12,000 withdrawal and setting up new fee structures. Recent comments confirm the \$12,000 withdrawal was paid, the pension account was activated, and the required fee forms were submitted, though follow-ups remain for final exit statements and closure of the old account. The current status is largely complete, with only administrative loose ends like tracking remaining super withdrawals and updating client records.
Client 102 PL	FP - Term Deposits	The client initially planned a \$1M term deposit (TD) but adjusted it to \$900K for 6 months after the draft was rejected, likely due to tax or cash flow considerations. The revised TD with Adelaide Bank was successfully settled, with the remaining \$100K invested in the Balanced Model, and a review of advice (ROA) task is now set. The current status is complete, with funds allocated as instructed and a follow-up scheduled.
